Re: Westover Hills Transit Service Center

MDP # 020-07

Dear Mr. Brown,

The City Staff Development Review Committee has reviewed the **Westover Hills Transit Service Center** Master Development Plan, **MDP # 020-07**. Please find enclosed a signed copy for your files. Your plan was approved for acceptance, however, please note the following conditions:

In consideration of public safety and convenience, excessive grades by reason of topography should be avoided in street layouts and arrangements. Any access and R.O.W. issues along state facilities will need to be resolved with the **Texas Department of Transportation (TXDOT)**. For information about these requirements you can contact TXDOT at (210) 615-5814.

Historic Preservation approves with the following conditions:

- The Texas Sites Atlas indicates that archaeological sites have been previously identified nearby the above referenced property, particularly along areas/ adjacent to Leon Creek. Therefore, the property may contain historic sites, some of which may be significant. Thus, before any site is begun we recommend that a qualified professional conduct an archaeological investigation of the property. The investigation should be performed in accordance with Archeological Survey Standards for Texas. Previously identified sites if any, should be reexamined and reevaluated.
- If there are any lands or easements owned or controlled by the State of Texas or any of its political subdivisions within the property, or if there is any federal agency involvement or jurisdiction relating to the property or its development, the Texas Historical Commission (THC) may require other archaeological compliance efforts additional to those required by the City Historic Preservation Office (HPO).

If there are any questions or additional information regarding archaeological sites please call Kay Hinde at (210)-207-7306.

Traffic Impact Analysis & Streets Division approves with the following conditions:

- The Level-1 Traffic Impact Analysis (TIA) and the MDP plan for Westover Hills Transit Service Center MDP are in compliance with TIA Ordinance 91700 and the Unified Development Code.
- The following requirements and on-site improvements are necessary and shall be provided by the developer, on and before the completion of the subject project, at no cost to the City of San Antonio.
 1. All access roadways shall provide clear sight distance on all existing and proposed roadways in order to provide adequate obstruction free viewing distances for approaching traffic. All signage, landscaping, and improvements shall be selected and located so as not to block clear sight distance areas.
 2. All commercial driveways for this project shall comply with UDC §35-506, (r) Access and Driveways.

It should be understood that this is a general review of a conceptual plan not an in-depth review of internal and external traffic flow, nor streets and drainage plans. The internal street network shall be planned in order to provide safe and efficient movement of traffic to and from, within and past, the proposed development, while minimizing the impact to non-site trips. All technical requirements of the Unified Development Code will be complied with at the time of platting or permitting.

If there are any questions or additional information call Nick V. Fernandez at (210)-207-0282.

Tree Preservation approves with the following conditions:

- The 2006 Tree Preservation ordinance standards per UDC §35-523 require a Tree Preservation Plan prior to any work on site. This can be submitted either as a site work permit or at the platting or building permit stage.
- Landscape ordinance per UDC §35-511. It appears some landscape points can be met by preserving existing vegetation as well as meeting any mitigation requirements either through preservation of smaller material or transplanting. Recommend securing knowledgeable Landscape Architect at planning and design phase to better utilize existing trees and vegetation. Preservation will eliminate the need for irrigation. Staff would be willing to meet with developer at design stage to assist with tree preservation and landscape plan.
- Additional permitting fees and affidavits will be needed to obtain tree permits during the platting and/or building permit stages.

If you have any further questions, please call Joan Miller at (210) 207-8265.

Fire Protection approves with the following conditions:

- The Fire Protection Review section reserves the right to review and make comments for fire protection at the time of permit submittal.

If you have any further questions, please call Richard Chamberlin at (210) 207-8281.

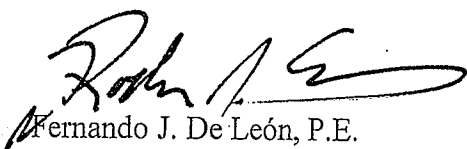

- Development of the property shall comply with the Highway 151 Gateway Corridor District Zoning ordinance.

All platting shall comply with the Unified Development Code (UDC), Master Plan, and Major Thoroughfare Plan for the City of San Antonio. It will be expected that all of the property depicted in your Master Development Plan to include floodplains, drainage areas, and open space shall be platted. It is suggested to work closely with the school district, so they can plan accordingly.

Please note that this action by the committee does not establish any commitment for the provision of utilities, services or zoning of any type now or in the future by the City of San Antonio. The rights for this project shall expire within twenty-four months from the date of approval if less than eight percent of the net area of the project or less than twenty acres is subject to an approved final plat or an expenditure less than five hundred thousand dollars has been made as per UDC §35-412, (h)(1).

Should you need further assistance, please contact Richard Carrizales at (210) 207-8050.

Sincerely,

Fernando J. De León, P.E.
Assistant Director Development Services Department
Land Development Division
